Desa Lumban Bulbul, Kec. Balige, Kab. Toba, Sumatera Utara 22312

I am Christian, a 6th semester student of Software Engineering Technology Study Program at Del Institute of Technology.I have a strong interest in frontend and backend software development, as well as UI/UX design. I have experience in developing websites and mobile applications, and designing user interfaces that meet project needs through various academic and organizational projects. I can work effectively in a team, have leadership abilities, and manage time well to ensure each project is optimally completed. In the future, I would like to continue honing my skills in full-stack development and UI/UX to prepare myself for the professional world.

Education Level

Institut Teknologi Del - **Laguboti, North Sumatera, Indonesia** Aug 2022 - Sep 2026 (Expected)

Bachelor of Applied Software, 3.08/4.00

Work Experiences(Projects)

Coding Camp by DBS Foundation - **Indonesia** Jan 2025 - Apr 2025

Machine Learning Engineer Intern

Participated in an intensive coding bootcamp focused on data science, data analysis, and machine learning technologies, gaining comprehensive hands-on experience.

- Participated in an intensive coding bootcamp focused on data science, data analysis, and machine learning technologies, gaining comprehensive hands-on experience.
- Proficient in SQL and Python for data analysis using libraries such as Pandas, NumPy, and Matplotlib.
- Implemented machine learning and basic deep learning models from theory to real-world applications.
- Experienced in end-to-end data workflows, including data preprocessing, feature engineering, model evaluation, and deployment.

Development of Mobile E-Commerce Application – Rumah Kreatif Toba - **Toba, Indonesia** Jan 2025 - Jul 2025

Developed Rumah Kreatif Toba Mobile App with key features developed including user authentication, chat between buyers and sellers, product catalog with search and filters, shopping cart, flexible checkout, order history, and product reviews.

- Developed a mobile e-commerce application featuring user authentication, real-time chat between buyers and sellers, product catalog with search and filtering, flexible checkout process, order history, and product review functionality.
- Utilized Flutter (Dart) for mobile front-end development, Laravel (PHP) for building robust back-end APIs, and MySQL for centralized data storage.
- Implemented an admin dashboard, seller management tools, and a help center to enhance platform usability and support.
- Collaborated in an Agile Scrum environment across three sprint cycles, actively contributing to both UI/UX design and full-stack development.

Development of Church Information Management System for HKBP Parparean Web-based Platform - **Toba, Indonesia** Jan 2024 - Jun 2024

Development of Church Information Website HKBP Parparean

- Built a web-based information system for HKBP Parparean with features like user registration, news, announcements, and service scheduling.
- Designed MySQL database and implemented backend with Laravel (PHP) for content and member management.
- Developed responsive front-end using HTML, CSS, JavaScript, and Bootstrap for both public and admin interfaces.

Identification of Corn Leaf Diseases Using Machine Learning - **Toba, Indonesia** Aug 2024 - Dec 2024

Developed a machine learning-based web application for detecting corn leaf diseases using Convolutional Neural Network (CNN) with Transfer Learning (DenseNet121).

- Utilized Jupyter Notebook for preprocessing, model training, and evaluation with key metrics such as accuracy, precision, recall, F1 score, and confusion matrix.
- Applied image processing techniques including data augmentation and enhancement to improve model generalization.
- Deployed a user-friendly web interface using Flask for real-time image input and disease diagnosis (e.g., Leaf Wilt, Leaf Spot, Rust).

Development of Rumata Coffee's Digital Marketing Website - **Toba, Indonesia** Jan 2023 - Jun 2023

This final project is intended to function as a digital information system to effectively promote and present Rumata Coffee’s products and services to a wider online audience.

- Developed a structured database architecture supporting multi-level user roles using Native PHP and MySQL.

- Implemented an automated content management system (CMS) to handle product data, image uploads, and customer feedback efficiently.
- Integrated third-party APIs such as Google Maps and WhatsApp to enhance data flow and improve system interoperability.

Organisational Experience

Badan Eksekutif Mahasiswa (BEM) - **Del Institut of Technology** Nov 2024 - Present

Treasurer of the Religious and Social Department

Department of Religious and Social (DEPAGSOS)

- Contributed to organizing spiritual and social programs such as weekly student worship, monthly and weekly reflections, religious celebrations, and charity events.
- Helped manage department budgeting and financial records for regular and non-regular events to ensure transparency and efficiency.
- Supported initiatives that promote compassion, unity, and the values of MarTuhan, Marroha, and Marbisuk among students through meaningful campus-wide activities.

Badan Eksekutif Mahasiswa (BEM) - **Del Institut of Technology** Nov 2023 - Nov 2024

Member of the Religious and Social Department

Department of Religious and Social (DEPAGSOS)

- Assisted in planning and executing spiritual and social programs such as weekly worship services, student reflections, religious events, and charity initiatives.
- Collaborated with the team in coordinating logistics, communication, and volunteer involvement for department activities.
- Promoted campus values of MarTuhan, Marroha, and Marbisuk by supporting inclusive programs that foster unity and social awareness.

HIMAPRO - **Del Institut of Technology** Sep 2022 - Present

Member

Association of Software Engineering Technology Students

- Actively participated in organizational activities and events organized by the Student Association of Software Engineering Technology.
- Supported events through coordination and collaboration with team members.

Google Developer Student Clubs (GDSC) - **Del Institut of Technology** Sep 2023 - Present

Member

- Collaborated with fellow members on team-based projects utilizing Google technologies to address real-world problems.
- Participated in practical workshops and hands-on coding sessions to enhance technical proficiency and project development skills.

Certification & Skills

- **Certification** ✓ (2025): Pengenalan ke Logika Pemrograman (Programming Logic 101) | Dicoding
- **Certification** ✓ (2025): Memulai Pemrograman dengan Python | Dicoding
- **Certification** ✓ (2025): Belajar Dasar Structured Query Language (SQL) | Dicoding
- **Certification** ✓ (2025): Belajar Dasar Visualisasi Data | Dicoding
- **Certification** ✓ (2025): Belajar Dasar AI | Dicoding
- **Certification** ✓ (2025): Belajar Dasar Git dengan GitHub | Dicoding
- **Certification** ✓ (2025): Memulai Dasar Pemrograman untuk Menjadi Pengembang Software | Dicoding
- **Certification** ✓ (2025): Python Introduction for Data Anlysis | MySkill
- **Certification** ✓ (2025): Java Script Intermediate | Sololearn
- **Webinars Attended** ✓ (2025): Hari Kebangkitan Nasional | UNIMED
- **Soft Skills**: Problem Solving, Team Collaboration, Communication Skills, Time Management, Analytical Thinking, Leadership.
- **Hard Skills**: Website Frontend Development (HTML5, CSS, JavaScript, Bootstrap, Vue.js, React), Website Backend Development (PHP, Laravel, SQL, MySQL), Mobile Application Development (Flutter, Dart), UI/UX Design (Figma), Programming Languages (Python, PHP, JavaScript, Dart), Database Management (MySQL).
